Tiered Quantity Pricing for Drupal Commerce

Version
1.0.0
ecom-
addons.com

Tiered Quantity Pricing for Drupal Commerce gives a **lower price per unit to customers who buy several units** of a product: for example 10 % off each mug from 2 mugs and 20 % off each from 3. A selector in the add-to-cart form shows the options with their totals, and the order gets the matching discount.

Ceramic Mug

Price
18,00 €

Buy more, pay less per unit

☐	1 unit	18,00 €
☒	2 units 10% off	36,00 € 32,40 € 16,20 € per unit
☐	3 units 20% off	54,00 € 43,20 € 14,40 € per unit

1 Choosing an option sets the quantity to add to the cart.

The discount is applied in the cart, also when you add units one by one.

Quantity

In the add-to-cart form: one option per quantity, with the total, the price per unit and the saving.

Requirements

Component	Version
Drupal	11.3 or later
Drupal Commerce	3 (Product, Order and Cart modules)
PHP	8.3 or later

Installation

1. Download the latest version from **My account > Downloads** on ecom-addons.com.
2. Extract it to `modules/custom/ecom_addons_quantity_offers` and enable **Quantity Offers** in **Extend** (or `drush en ecom_addons_quantity_offers`).
3. Give the **Administer quantity offers** permission to the roles that manage prices.
4. Your offers are in **Commerce > Quantity offers**.

Commerce hides the **Quantity** field of the add-to-cart form by default. As the selector sets that field, enabling the module shows it in the **Add to cart** form display of each order item type that sells product variations (once; you can move it there afterwards).

Create an offer

In **Commerce > Quantity offers**, click **New quantity offer**:

Field	What to enter
Name	For you only; customers do not see it.
Quantities	Up to 4 rows: from how many units (2 to 99) and the discount on each unit (1 to 90 %). Larger quantities need larger discounts. Leave unused rows empty.
Products	Product names, separated by commas (autocomplete). Every variation of a product counts towards the quantity. A product can be in one offer only.

Edit quantity offer ☆

Name

Shirts and totes

For you; customers do not see it.

Quantities

From (units)	Discount per unit (%)
2	5 %
4	10 %
6	15 %
	%

1 From 6 units, each one costs 15% less. Variations count together.

Up to 4 quantities, from 2 to 99 units; larger quantities need larger discounts. Leave unused rows empty.

Products

Linen Shirt (1), Canvas Tote (2)

Separate products with commas. Every variation of a product counts towards the quantity. A product can be in one offer only.

An offer: a name, up to four quantities with their discount per unit, and the products.

What customers see

Above the quantity field, **"Buy more, pay less per unit"** lists one unit and each quantity of the offer for the selected variation: total, regular total struck through, price per unit and saving. Choosing an option fills the quantity field; typing a quantity selects the matching option. Choosing another variation refreshes the amounts.

In the cart, the order summary shows a **Quantity offer (20% off)** line with the discount; it follows the quantity when the cart is updated.

Shopping cart

Item	Price	Quantity	Remove	Total
Ceramic Mug	18,00 €	3	<button>Remove</button>	54,00 €
				Subtotal 54,00 €
				Quantity offer (20% off) -10,80 €
				Total 43,20 €

1 3 mugs: 20% off each unit.
Remove one and it becomes
the 2-unit discount.

Checkout

In the cart, the tier discount is a promotion adjustment of the order item, shown in the order summary.

How it works

An order processor adds a **promotion adjustment** to each order item of an offer's product, using the tier reached by all the units of that product in the order (variations count together). It runs before Commerce promotions and taxes, so the order total, taxes, the placed order and its emails include it. Product pages and price fields keep the regular price.

How offers combine with other discounts

Quantity offers ☆

+ New quantity offer
Commerce inbox (3)

Each offer gives a percentage off every unit once the cart holds enough units of a product (all its variations together). Customers pick the quantity in a selector of the add-to-cart form.

Name	Quantity → discount per unit	Products	Operations
Mugs: 2 or 3 units	2 → 10 %, 3 → 20 %	Ceramic Mug	Edit ▼
Shirts and totes	2 → 5 %, 4 → 10 %, 6 → 15 %	Linen Shirt, Canvas Tote	Edit ▼

^ How offers combine with other discounts

- A variation on sale (a list price above its price, as flash sales set it) keeps its sale price: the selector is hidden and the offer is not applied. The two never stack.
 - The discount is a promotion adjustment of the order item: product pages, lists and the price history keep the regular price.
 - Commerce promotions and coupons apply as usual, after the quantity discount.

1 Never stacked: a variation on sale keeps its sale price.

Commerce > Quantity offers: every offer with its quantities and products, and how offers combine with other discounts.

- **Never stacked.** A variation on sale — a list price above its price, as our Flash Sales Countdown module sets it during a flash sale — keeps its sale price: the selector is hidden and the offer is not applied. When the sale ends, the offer applies again.
- **Prior-price notices are not affected:** the variation's price never changes because of an offer.
- **Commerce promotions and coupons** apply as usual, after the quantity discount.

Styling

The selector uses your theme's font. Override the CSS variables `--ecom-qo-accent` , `--ecom-qo-border` , `--ecom-qo-bg` and `--ecom-qo-selected-bg` of `.ecom-qo` in your theme to change its colours. The markup depends only on the variation and the offers, so the page cache stays correct (it is invalidated when offers change).

Data and uninstall

The offers are stored in the module's configuration. No personal data and no external service. Uninstalling removes the configuration; placed orders keep their adjustments. The Quantity field stays in the add-to-cart form.

Languages

The module ships Spanish and French translations (`translations/es.po` , `translations/fr.po`), imported when the module is enabled on a site with those languages.

Updates and support

Your licence includes every new version and 6 months of support. New versions are in **My account** › **Downloads**; for help, open a ticket in **My account** › **Support**.
