Frequently Bought Together & Bundle Discount

Version
1.0.0
ecom-
addons.com

Frequently Bought Together & Bundle Discount adds a "**Frequently bought together**" block under the product page: the products that go with it, each with a checkbox, the total of the ticked ones and one button that puts them all in the cart. A bundle can also give a **discount for buying the whole set**, charged in the cart.

Frequently bought together

☒ This item: Mug The adventure begins
€11.90

+

☒ Mug Today is a good day
€11.90

+

☒ Mountain fox cushion
€18.90

1 Untick a product and the total and button update.

10% off when you buy all 3 together

Total price: €42.70 **€38.43**

You save €4.27

ADD ALL 3 TO CART

2 The bundle discount is applied in the cart. Products already on sale keep their own price.

2 Optional bundle discount, for the complete set.

Under the product: the products bought with it, the total of the ticked ones and one button for all of them.

Requirements

Component	Version
PrestaShop	8.2 or 9.0
PHP	8.1 or later
Theme	Classic theme tested; any theme that prints the standard <code>displayFooterProduct</code> hook

Installation

1. Download the latest version from **My account > Downloads** on ecom-addons.com.
2. In the back office, open **Modules > Module Manager**, click **Upload a module** and drop the zip.
3. Click **Configure**, then **New bundle**.

Create a bundle

On the module page, click **New bundle** and fill in:

Field	What to enter
Product	The ID of the product whose page shows the bundle (see Catalog > Products). One bundle per product.
Shown with	Up to 3 product IDs separated by commas, in the order you want them shown.
Bundle discount	Percentage off each product of a complete set in the cart, from 0 (no discount) to 50.

Edit bundle

* Product
ID of the product whose page shows the bundle (see Catalog > Products).

* Shown with
Up to 3 product IDs separated by commas, in the order shown. Products with combinations are added with their default combination.

Bundle discount %
Off each product of a complete set in the cart, from 0 (no discount) to 50.

1 Set it to 0 for no discount

A bundle: the product, up to three products shown with it and the discount for buying them together.

Products without a bundle

Under the bundles, **Products without a bundle** has two settings:

Setting	Default	What it does
Suggest products from past orders	Yes	Shows the products most often ordered together with the product in valid orders of the last 12 months (at least 2 orders together). Suggestions carry no discount.
Number of suggested products	2	From 1 to 3.

The counts are refreshed every 6 hours and when you save these settings.

Bundles

+ New bundle

A bundle shows up to 3 products under the page of a product, with one button to add them all to the cart. Products without a bundle can show the products most often ordered with them.

Product	Shown with	Bundle discount		
Mug The adventure begins (#7)	Mug Today is a good day (#8), Mountain fox cushion (#9)	10 %	Edit	Delete
Brown bear cushion (#10)	Mountain fox notebook (#16), Hummingbird printed t-shirt (#1)	5 %	Edit	Delete

How the bundle discount works

1

- The discount is a cart rule of the customer's cart, recalculated on every change. It covers complete sets only: one unit of the product and one of each product shown with it.
- A product with a discount of its own (a specific price, a catalog price rule, a flash sale or a quantity offer) keeps it and gets no bundle discount. The two never stack.
- Vouchers apply to the cart as usual, together with the bundle discount.

1 Never stacked: a product with its own discount keeps it.

Products without a bundle

2 Products ordered together at least twice in the last 12 months.

2

Suggest products from past orders

☒ Yes

Shows the products most often ordered together with the product in the last 12 months (at least 2 orders together), without a discount.

Number of suggested products

2

Save

The module page: the bundles, how their discount works and the suggestions for products without a bundle.

What customers see

The block shows the product of the page (**This item**) and the products shown with it, each with its image, name and current price. Every product is ticked; unticking one updates the total and the button (**Add all 3 to cart**, **Add 2 to cart...**). With a discount, the block shows it as a badge, the regular total struck through and the saving, only when every product is ticked. The button adds one unit of each ticked product (or its minimum quantity) with its default combination and opens the cart. Products that are disabled, not orderable or out of stock (unless they can be ordered without stock) are not shown; a bundle that loses a product also loses its discount.

SHOPPING CART

	Mug The adventure begins €11.90	1	€11.90	
	Mug Today is a good day €11.90	1	€11.90	
	Mountain fox cushion €18.90 Color: White	1	€18.90

Delivery policy
(edit with the Customer Reassurance module)

Return policy
(edit with the Customer Reassurance module)

All three in the cart with one click; the bundle discount is a native cart rule of this cart.

How the discount works

- **A cart rule of one cart.** The module creates a cart rule with a secret code for the customer's cart, named **Bundle discount**, and updates or removes it whenever the cart changes and when the cart and checkout pages open. The order and the invoice keep it like any voucher.
- **Complete sets only.** The cart needs one unit of the product and one of each product shown with it. Two complete sets get the discount twice; a third unit of one product alone gets nothing. All combinations of a product count together, and a unit is used by one bundle only (bundles with the larger discount first).
- **Never stacked.** A product with a discount of its own — a specific price, a catalog price rule, a flash sale of our Flash Sales Countdown module or a tier of our Quantity Discounts with Pack Selector module — keeps it and gets no bundle discount. The other products of the set still get theirs.
- **Vouchers** apply to the cart as usual, together with the bundle discount.

Styling

The block uses your theme's font and button. Override the CSS variables `--ecom-bt-accent`, `--ecom-bt-border`, `--ecom-bt-bg` and `--ecom-bt-muted` of `.ecom-bt` in your theme to change its

colours.

Data and uninstall

The module stores the bundles and settings in configuration values, the cart rules it creates in its own table and the counts of products ordered together in a cache table; no personal data and no external service. Rules of carts idle for 30 days are removed when an order is placed. Uninstalling removes the rules of carts not ordered yet, the tables and the settings; placed orders keep their discount.

Languages

The module is translated into English, Spanish and French; the block and the cart line follow the language of the shop.

Updates and support

Your licence includes every new version and 6 months of support. New versions are in **My account** › **Downloads**; for help, open a ticket in **My account** › **Support**.
