Smart Product Badges

Version 1.1.0
ecom-addons.com

Smart Product Badges adds automatic badges to your product images: **Sale** with the real discount, **New**, **Low stock** and **Bestseller**. Once the rules are set, every product gets the right badges without editing it.

Badges on a product list, added automatically by the rules.

Requirements

Component	Version
PrestaShop	8.2 · 9.0
PHP	8.1 or later
Theme	Classic (tested) or another theme that prints product flags

Installation

1. Download the latest version from **My account > Downloads** on ecom-addons.com.
2. In the back office, go to **Modules > Module Manager** and click **Upload a module**.
3. Choose the zip file. The badges appear straight away with the default rules.

Configuration

Go to **Modules > Module Manager**, find Smart Product Badges and click **Configure**.

Product badges

Badges are added automatically to product images in product lists and on product pages. They replace PrestaShop's own discount and "New" flags while those rules are on. Leave a label empty to use the translated default.

Maximum badges per product

From 1 to 4. Badges are shown in this order: sale, new, low stock, bestseller.

Shape

1 How many badges a product shows, and their shape.

Save

Sale

Shown when the product has a discount, with the discount percentage.

Enabled ☒ Yes

Label

Default: `-{percent}%`. `{percent}` is replaced by the discount.

Colour

2 Your own text in each language; `{percent}` becomes the discount.

3 Your colours; the text turns navy or white to stay readable.

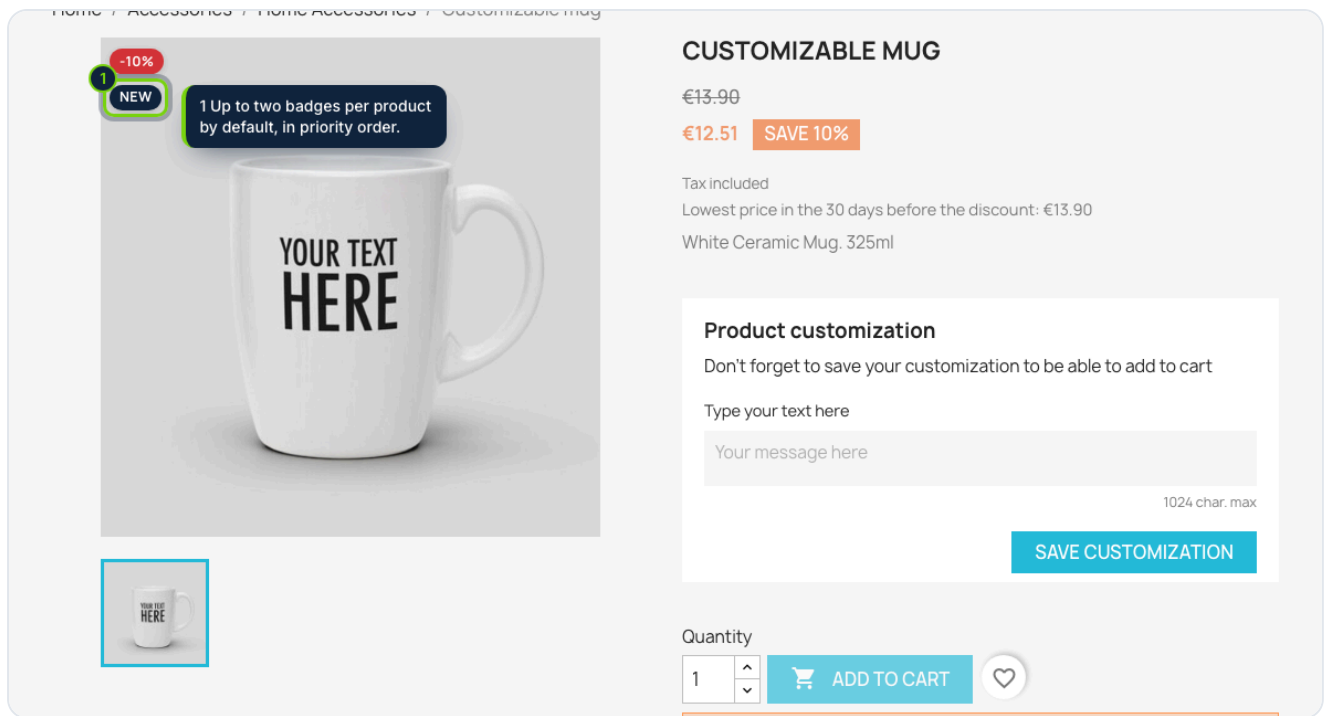

Module settings: one section per rule, with sensible defaults.

Setting	What it does
Maximum badges per product	How many badges a product can show at once (2 by default, up to 4). They follow the order Sale, New, Low stock, Bestseller.
Shape	Pill, rounded or square.
Enabled	Turns each rule on or off.
Days considered new	A product is <i>New</i> during this many days after it was added to the catalog (30).
Stock threshold	<i>Low stock</i> appears when the quantity is at or below this number (5).
Minimum units sold	<i>Bestseller</i> appears from this number of units sold (50).
Label	Your own text, in each language. Leave it empty to use the translated default. In the Sale label, <code>{percent}</code> is replaced by the discount.
Colour	Background colour of the badge. The text turns white or dark automatically for contrast.

How the rules work

- **Sale** is shown when the product has a discount (a specific price or a catalog price rule). The percentage is calculated from the regular and the discounted price the customer sees, for the combination shown.
- **New** counts the days since the product was added to the catalog.
- **Low stock** applies when stock management is on, the product is not virtual and it is still in stock.
- **Bestseller** uses the units sold that PrestaShop records for each product.

While the Sale and New rules are on, PrestaShop's own discount and "New" flags are replaced by these badges, so you never see two. Other flags of your theme (Pack, Out of stock, Online only...) stay as they are.

On the product page the badges sit on the cover image.

Styling

The badges are product flags, so your theme places them. They carry these CSS classes:

- `.product-flag.ecom-sb` and `.ecom-sb--pill`, `--rounded`, `--square`.
- `.ecom-sb__badge--sale`, `--new`, `--low_stock`, `--bestseller`, with the colours in the custom properties `--ecom-sb-bg` and `--ecom-sb-fg`.

Languages

The module is translated into English, Spanish and French. Your own labels can be set for every language of the shop.

Updates and support

Your licence includes every new version and 6 months of support. New versions are available in **My account > Downloads**; for help, open a ticket in **My account > Support**.
